

Dear Colleagues, Dear Friend,

We are pleased to welcome you for this 80th edition of the annual congress of the French Society of Phlebology.

For this new edition, we are opening up to an innovative architecture, reflecting the history of phlebology and the SFP.

Indeed, our speciality, rooted in these foundations through the enormous medical and technical progress of the 20th century, must now mark and anticipate the evolution of our practices in the 21st century.

This congress therefore marks the beginning of a new generation of congresses, focused on tomorrow's training, which we hope will become permanent and for which we are working.

We hope to see many of you there with the same enthusiasm and human warmth, despite social distancing, and hope that your desire to keep on learning will be satisfied by the high quality of the lecturers, papers and workshops, always in a friendly atmosphere.

**The main topics in 2022 will be:**

- Thermal treatments / radiofrequency thermal treatments
- Non-thermal, non-tumescent treatments Sclerosis / Moca
- Non-thermal, non-tumescent, non-sclerosing treatments
- Conservative treatments
- Phlebectomies
- Venous thrombo-embolic diseases
- Ulcers
- Aesthetics
- Veinotonic
- & numerous workshops / communication sessions

Yours sincerely,

Matthieu JOSNIN

President of the SFP and of the Congress Organising Committee
